Application: AHU Silencers (Centrifugal Fans)

() CHALLENGE

- Limited Silencer > **Connection Sizes**
- Insufficient Straight Duct >

Limited space and no straight run of ductwork connected the 30,000 CFM air handling unit to the supply and return ductwork on the floor below.

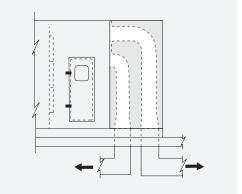

Silencer sections aerodynamically connect air handling unit to distribution ductwork.

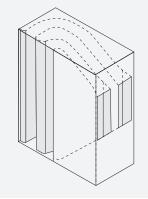

OSOLUTION

AHU SILENCER SECTIONS (CENTRIFUGAL FANS)

201

Both the supply and return silencer sections were designed with streamlined internal acoustic baffles and connections which matched the air handling unit's and the distribution ductwork. The resulting configuration was elbow/transitional silencing sections.
